**Objective**

Fullstack or backend java developer, being in touch with new technologies, working with micro services, spring boot, rest api, cloud, and taking part in challenging projects. Taking part of a passionate team for coding and learning the latest technologies.

**Education**

Post-Graduate MIT in Cloud Computing, INFNET Institute  
Analysis and Systems Development, Unicesumar University, December 2021.

**Related Courses**

Kubernetes

Kotlin

Specialist Spring REST (Algaworks)

Java Web Full-Stack Training, JDev Training (400 hours)

Java 13 Full Professional with Real Projects, Cod3r

Full Java Object Oriented Programming with Projects, Nélío Alves

Spring ReactJS week, DevSuperior

Microservices with Spring Cloud, Spring Boot and Docker

Apache Kafka with Spring Boot

Google Cloud

**Skills*****Backend:***

Java EE, EJB, JPA, Spring Boot for Rest Web Service, Microservices, Spring Batch, Eureka, OpenAPI Swagger, Docker, Kubernetes.

Apache Kafka environment with docker compose.

**Front-end:**

JSF, Primefaces, Angular, PrimeNG, Thymeleaf

**Application Server:** Glassfish, Payara, Tomcat

**Database:** Postgresql, Mysql

**Experience**

I have been working with Java for the last 5 years, developing backend projects with Spring Boot, Rest API, Spring Batch, Java EE, EJB, JPA. On frontend I develop with JSF and I have a basic knowledge of React.

Messaging with Kafka and Spring Boot.

Database, in the last projects, I worked with Postgresql and Mysql.

I have been working on:

- Providing rest web services for third-party companies;
- Microservices with Spring Boot, Spring Cloud at Google Cloud FullStack Developer
